Job Description :

Welder : 30 nos. ITI pass minimum qualification, 2-20 years experience

A Welder joins metal parts using various welding techniques, ensuring structural integrity and precision. They interpret blueprints, select materials, and operate welding equipment to fuse metal components. Welders may also repair damaged metal structures, maintain equipment, and ensure safety regulations are followed. Necessary test certificates required to be a welder.

Welding machine necessary

2) Gas Cutter: 20 nos. ITI pass minimum qualification, 2-20 years experience

A Gas Cutter, also known as an oxy-gas cutter or flame cutter, uses oxy-fuel cutting torches to cut and trim metal components. Required for construction, and operate both manual and mechanized cutting equipment, following safety protocols and industry standards.

3) Masons : 30 nos. 2-20 years experience

A Mason constructs and repairs structures using materials like brick, block, and stone, ensuring structures are built to plans and meet safety standards. They mix mortar, lay materials, and may also perform repairs and maintenance on existing structures

4) Electricians: ITI pass minimum qualification, 2-20 years experience

An electrician's job involves

installing, repairing, and maintaining electrical systems in buildings, homes, and factories. They work with wiring, control systems, lighting, and other electrical components, ensuring safety and functionality. Electricians may also troubleshoot electrical issues, follow building codes, and train other workers.

Role Category:

Not Specified
